VOL. 102 NOS. 1–4

16 DECEMBER 2002

Announcement	1
------------------------	---

Ruminants

Effects of urea, isolated soybean protein and blood meal on growing steers fed a corn-based diet W.F. Knaus (Vienna, Austria), D.H. Beermann (Lincoln, NE, USA), L.O. Tedeschi, M. Czajkowski, D.G. Fox and J.B. Russell (Ithaca, NY, USA)	3
Effects of several protein supplements on flow of soluble non-ammonia nitrogen from the forestomach and milk production in dairy cows C.W. Choi, A. Vanhatalo, S. Ahvenjärvi and P. Huhtanen (Jokioinen, Finland)	15

Non-Ruminants

Effects of glucanase inclusion in a de-hulled barley diet on the growth performance and nutrient digestion of broiler chickens B. Yu, Y.-M. Sun and P.W.-S. Chiou (Taichung, Taiwan)	35
Endogenous lipolysis in feedstuffs and compound feeds for pigs: effects of storage time and conditions and lipase and/or emulsifier addition N.A. Dierick and J.A. Decuyper (Proefhoevestraat, Belgium)	53
Effect of chemical content and physical characteristics on nutritional value of wheat, barley and oats for poultry B. Svihus (Ås, Norway) and M. Gullord (Ilseng, Norway)	71
Microbial caecal fermentation in Iberic or Landrace pigs given acorn/sorghum or maize diets estimated in vitro using the gas production technique M. Fondevila (Zaragoza, Spain), J. Morales, J.F. Pérez (Barcelona, Spain), A. Barrios-urdaneta (Zaragoza, Spain) and M.D. Baucells (Barcelona, Spain)	93
Tropical fibre sources for pigs—digestibility, digesta retention and estimation of fibre digestibility in vitro N.N.X. Dung, L.H. Manh (Cantho, Viet Nam) and P. Udén (Uppsala, Sweden)	109
Ileal and total tract digestibility, and protein and fat balance in pigs fed rice with addition of potato starch, sugar beet pulp or wheat bran J.F. Wang, B.B. Jensen, H. Jørgensen (Tjele, Denmark), D.F. Li (Beijing, China) and J.E. Lindberg (Uppsala, Sweden)	125

General topics

Effects of pH and fibrolytic enzymes on digestibility, bacterial protein synthesis, and fermentation in continuous culture W.Z. Yang, K.A. Beauchemin and D.D. Vedres (Alta, Canada)	137
The effect of freezing and thawing on grass silage quality predictions based on near infrared reflectance spectroscopy R.S. Park, R.E. Agnew (Hillsborough, UK and Belfast, UK) and D.J. Kilpatrick (Belfast, UK)	151

Methodologies

Laboratory variation of 24 h in vitro gas production and estimated metabolizable energy values of ruminant feeds	
G. Getachew (Davis, CA, USA), G.M. Crovetto (Milan, Italy), M. Fondevila (Zaragoza, Spain), U. Krishnamoorthy (Bangalore, India), B. Singh (Palampur, India), M. Spanghero (Pagnacco, Italy), H. Steingass (Stuttgart, Germany), P.H. Robinson (Davis, CA, USA) and M.M. Kailas (Bangalore, India)	169
Changes in chemical composition and nutritive value of urea treated whole crop wheat during exposure to air	
J. Hill (Chelmsford, UK) and J.D. Leaver (Ashford, UK)	181

Short communications

Levels of biogenic amines in maize silages	
Š. Steidlová and P. Kalač (České Budějovice, Czech Republic)	197
Postprandial changes in particle associated ruminal bacteria in sheep fed ammoniated rice straw	
A.S.M. Selim, J. Pan, T. Suzuki, K. Ueda, Y. Kobayashi and K. Tanaka (Sapporo-shi, Japan) . .	207
The influence of fermented putak on diet digestibility and growth performance of weanling pigs	
U. Ginting-Moenche (Kupang, Indonesia), S. Chakeredza (Mazowe, Zimbabwe) and U. ter Meulen (Goettingen, Germany)	217
Stochastic true digestible amino acid values	
W.B. Roush and T.L. Cravener (University Park, PA, USA).	225
